

TENTATIVE SCHEDULE

September 26	September 27	September 28	September 29
•Registration •Poster session •Welcome party	•Opening ceremony •Plenary lecture •Oral presentation •Banquet	•Oral presentation	•Field trip (optional)

MMIJ & EARTH 2017, Sapporo
The Mining and Materials Processing Institute
of Japan (MMIJ)
Fall Meeting 2017, Sapporo &
The 14th International Symposium
on East Asian Resources Recycling Technology

IMPORTANT DATES

- ✓ First Circular : *December, 2016*
- ✓ Abstract Submission : *May 17 – July 5, 2017*
- ✓ Pre-registration : *May 17 – August 9, 2017*
- ✓ Full Paper Submission: *July 6 – September 13, 2017*

Organizer

- The Mining and Materials Processing Institute of Japan (Japan)

Co-organizers

- The Korean Institute of Resources Recycling (Korea)
- The Formosa Association of Resource Recycling (Taiwan)
- The Non-ferrous Metals Society of China (China)
- Chulalongkorn University (Thailand)

CONTACT TO THE HOSTING SOCIETY

The Mining and Materials Processing Institute of
Japan (MMIJ)
9-6-41 Akasaka Minato-ku, Tokyo 107-0052 Japan

Welcome to Sapporo

September 26-28, 2017
Hokkaido University, Sapporo, Japan

SCOPE

The scope of the symposium covers all aspects related to policy, management, and technology on resources recovery and recycling. Topics of interest include, but are not limited to, the following:

-  Sustainable Resources Development and Utilization: Policy, Management, and Life-cycle assessment
-  Material Flow, Resources Recycling Economics and Policy
-  Recycling and Utilization Technology of Wastes, including industrial and municipal wastes, such as e-wastes, end-life vehicles, home appliances, etc.
-  Waste-to-Energy: Policy, Management, and Technology
-  Energy, Environment, and Related Social Issues

Preamble

Following the “Green” Revolution of the 21st century, our society has now embraced the concept of sustainability and is rapidly moving towards this direction. In terms of material production and utilization, this is an ambitious goal, and achieving it requires the advancement of not only our understanding of sustainable resources utilization and development but also of our current processing and recycling technologies. The EARTH symposium series was originally organized in cooperation with Japan, Korea, Taiwan and China to provide a venue for the discussion of topics on materials processing and recycling, which has been successfully conducted every two years for more than two decades. Two years ago, the 13th EARTH symposium was successfully held in Bangkok, Thailand that ushered the inclusion of ASEAN countries into the fold.

We are proud to announce that the 14th International Symposium on East Asian Resources Recycling Technology (EARTH 2017) will be held on September 26-29, 2017 in the beautiful and scenic city of Sapporo, Hokkaido, Japan.

This conference will be jointly organized with the Annual Fall Meeting of the Mining and Materials Processing Institute of Japan (MMIJ). With an expected attendance of more than 900 participants from the industry, academe and government, this meeting will be a great avenue for scientists and engineers to share their knowledge related to the sustainable utilization of resources and recycling.

CONFERENCE LANGUAGE

The language of the EARTH-2017 sessions of the conference is **English** and all presentations shall be made in English.

CONFERENCE FORMAT

The conference format shall apply to all presentations including plenary sessions by invited speakers as well as contributed oral & poster presentations.
