Hong Kong Waste Management Association (HKWMA)

► invitation message

Dear Industry Colleagues

Following its successful debut in 2003, the Enviro Asia Conference is scheduled to return to Singapore from the 9th - 11th Nov 2005, at the Singapore Expo.

This year, Enviro Asia will also see the introduction of the International Environment Summit 2005. This summit will be an interactive forum to review the increasing challenges and issues within the global environmental industry, and evaluate the latest technologies, systems, and methods to deal with global environmental concerns.

One key highlight of the International Environment Summit 2005 will be the presentations from the Turkish Ministry of Environment and Forest on the various emerging business opportunities in the country, resulting from their recently announced plans to spend up to 50 billion Euros on environmental improvement and infrastructure. There will also be presentations by other countries such as China and Thailand on the various opportunities and issues in environmental and water management in their respective countries.

The International Environment Summit 2005 will bring together under one roof policy-makers, service providers and end-users. It is envisaged to be an interactive forum for industry leaders to share their valuable experiences in working towards environmental sustainability. Countries such as Sweden and Canada will also be sharing on their success stories.

In addition, the International Environment Summit will also serve as an excellent platform to forge strong business or academic links in the environmental field.

It therefore, gives us great pleasure to invite you to join us in this highly anticipated event, **International Environment Summit 2005** and enjoy your stay in Singapore.

**Enviro Asia 2005
Organising Committee**

► Conference Objectives

Get an international perspective on a range of key environmental issues. Renowned speakers from the various countries who will share their views and experience on the different aspects of environmental management, such as:

- What are some of the current practices and lessons to be learnt from developed nations?
- What are some of the business opportunities available in the developing countries?
- What are some of the innovative technologies that are available in the market?
- How to cope with the changes in international environmental legislation?

► Highlights Of International Environment Summit 2005

Some of the main highlights of attending International Environment Summit 2005 will include:

- **Country Papers** including presentations from Europe, North America and Asia on their environmental management practices and emerging business opportunities.
- **Business and Industry Presentations** showcasing the latest technologies and methods for wastes management.
- **The EnviroAsia Innovations 2005 Competition** to seek out avant-garde initiatives/projects that contributes to a sustainable environment.

► Who Should Attend the International Environment Summit?

Within the three-day conference, speakers will present on a range of pressing environmental issues, waste management technologies, and approaches in countries around the world. A one-day site visit to several of Singapore's world class environmental facilities will also be held. With such an international perspective, it is a must-attend event for the following professionals:

- Governmental and Municipal Authorities
- Senior Environmental Officials
- Environmental and Water Industry Businesses
- Finance Managers and Venture Capitalists
- Building and Facilities Managers
- Environmental Scientists and Engineers
- Environmental Organisations/ Associations
- Environmental Educators
- Manufacturing Managers
- Environmental Technologists
- Oil, Gas and Petrochemicals Professionals
