

■ Scope and Topics

The scope of the symposium covers all aspects related to the resources recycling. Topics of interest include, but are not limited to the followings:

1. Policy, management system and life-cycle evaluation;
2. Recycling & utilization of industrial wastes: metals, slag, sludge, ash, catalyst, effluence, wastewater, gaseous waste, etc;
3. Recycling & utilization of electrical and electronic wastes;
4. Recycling & utilization of end-life vehicles, rubber, plastic, paper, glass and other living wastes;
5. Development of technologies for recycling and waste minimization production;
6. Treatment of heavy metals pollutants and resource recycle technology;
7. Environmental protection and other Related Issues.

■ Important Dates

First Circular and call for papers	30th Sep.2012
Deadline for abstract and pre-registration	15th Jan.2013
2nd Circular and full paper submission	31st Mar.2013
Deadline for early final registration	31st Aug.2013
Symposium and Exhibition	Early Nov.2013

■ **Abstract** (150-200 words) should be sent to the following address by E-mail: Secretariat@earth2013.org. Abstract should include title of presentation, authors, their affiliations and E-mail address of corresponding author. The official language of the symposium will be English.

Welcome to EARTH 2013 in Zhangjiajie, China

With economic blooming and industrial development, East Asian is facing resource depletion. Meanwhile, the industrial waste causes a serious resource wasting and environment pollution. Resource recycling technologies are progressing. Therefore, it is necessary to keep a forum in East Asia to share and discuss the progress, trends, experiences and achievements in the resources recycling research and technology field.

Following the successful eleven predecessors of the EARTH conference series, the 12th International Symposium on East Asian Resources Recycling Technology (EARTH 2013) will be held in China, in early November 2013. It will provide a forum to timely exchange and share the experiences and achievements related to all aspects of resources recycling.

The city Zhangjiajie, with National Forest Park cited in the World Natural Heritage List, is famous as a green tour destination, an optimal place to investigate resource recycling and sustainable development in site.

Participants all over the world are warmly welcome to attend EARTH 2013 in Zhangjiajie. Join us in EARTH 2013 to make it a memorable experience.
